

Long ago, as a dedicated angler and fly-tyer, I was unimpressed with the quality of the tools I was using. As a surgeon in the operating room, I was used to working with top quality instruments built to do specific jobs with great precision. In 1989, I founded the DR.SLICK Company with the sole purpose of creating the highest quality fishing and flytying tools available.

To this day, we continue to lead the industry in quality and innovation. Each DR.SLICK instrument we produce undergoes a 6 step inspection process to ensure the highest quality possible and each instrument carries our logo on it to guarantee you that it is the best we have to offer. If you want precision tools made to last, you'll want DR.SLICK.

- Ken High, M.D
